T6 Results

Document metadata: LO3 3.3 SC 3

Trial ID	Result Status Code	Comments
1	`sa-button no-select`	Lack of `tabindex` of button system component did not allow for it to be selected via keyboard
2	`fo-button no-select`	Fail from trial `1` does not occur anymore in this system version. Now same problem with `fo-button`.
3	`re-button no-select`	Same as `2` but with `re-button`.
4	`success`	All components are keyboard selectable and the actions are coherent with the console log output.
